ADITHYO DEWANGGA WIJAYA

Senior Solutions Manager

SINGAPORE +65 90616870 ADITHYO.WIJAYA@GMAIL.COM
SG.LINKEDIN.COM/IN/ADITHYODEWANGGA

SUMMARY

As a Senior Solutions Manager, I provide high-quality pre-sales technical consultation and develop cost-effective, resilient, innovative, and reliable ICT solutions for customers across the globe. With over 10 years of experience in network engineering and solution architecture, I have a strong background in data center, network security, and carrier ethernet technologies.

My core competencies include designing and integrating network solutions and managed ICT services for global SDWAN and MPLS/IP WAN networks, ensuring they meet customer requirements and industry standards. I also constantly review and propose improvements to enhance network performance and achieve network optimization. Additionally, I collaborate with vendors, partners, and internal teams to deliver high customer satisfaction and win proposals and tenders.

WORK EXPERIENCE

SENIOR SOLUTIONS MANAGER
SINGAPORE TELECOMMUNICATIONS LIMITED (SINGTEL)
AUG 2022 - PRESENT

- Provide high-quality pre-sales technical consultation, developing cost-effective, resilient, innovative, and reliable ICT solutions to win proposals and achieve high customer satisfaction.
- Design high-quality network solutions for global SDWAN and/or MPLS/IP WAN networks, understanding customers' networking and communications requirements.
- Act as an overall solution architect, integrating network solutions and managed ICT services to ensure they meet customer requirements.
- Proactively review customers' networks and propose improvements to enhance network performance and achieve network optimization.
- Offer technical support to account managers on Singtel services, assisting with any queries or issues that arise.
- Conduct presentations to customers on proposed solutions and new technologies, effectively communicating the benefits and value of the offerings.
- Prepare win/loss analysis for proposals, bids, and tenders, providing insights for continuous improvement of network designs.
- Maintain quality documentation and updates for customers' network configurations and processes, ensuring accuracy and accessibility.
- Support project managers and partners in WAN network project implementations, ensuring smooth and successful execution.
- Assist operations and service managers in post-sales queries, providing technical support and resolving any issues that may arise.

Supporting Customers:

- Wholesale / Carrier Sales
- Enterprise
- Financial sector
- Banking

Products and Environment:

Singtel Cable Infrastructure:

- Southeast Asia Japan Cable (SJC), SJC2, ADC, APCN2, C2C, i2i, SEA-ME-WE 3, SEA-ME-WE 4, China-US cable network, Japan-US cable network, Unity, Southern Cross

Fiber & Transmission:

- Dark Fiber
- Managed Dark Fiber
- Backhaul
- Managed DWDM (Nokia PSS Series, Infinera GX Groove, Ribbon Apollo Series, Huawei OSN)

Connectivity Solutions:

- Singtel Network-as-a-Service (NaaS) – Singtel CUBΣ
- Domestic connectivity – Meg@POP IP VPN
- Global Internet connectivity
- Wholesale carrier services
- International Private Leased Line (IPLC)
- ConnectPlus Ethernet Line (E-Line)
- ConnectPlus IP VPN (MPLS)

Software-defined Connectivity:

- Software-defined WAN (SD-WAN)
- IPVPN Cloud Connect (AWS, Google Cloud, Azure, Oracle Cloud)

Next-Gen Managed Services:

- Managed Network (Managed WAN, Managed LAN, Managed Wireless LAN, Managed Application Performance)
- Unified Communications
- Cloud-based hosted PBX
- SIP Trunking
- ISDN
- Teams UC Connector
- Enterprise IP PBX

Communications Platform-as-a-Service (CPaaS):

- SingVerify

Consulting & Professional Services:

- Managed Security Services (MSS)

SENIOR TECHNICAL SOLUTIONS ENGINEER
INGRAM MICRO SINGAPORE
NOV 2018 - AUG 2022

- Provided innovative network solutions to customers and potential customers, leveraging strong technical expertise and thought leadership during the pre-sales process.
- Engaged in consultative and technical solutions meetings, eliciting and understanding customer requirements to architect complete solutions in collaboration with sales, vendor, and internal solution teams.
- Took ownership and accountability for designing customers' IT infrastructure, ensuring optimal performance and meeting their specific needs.
- Collaborated closely with the sales team, providing technical proposals, presentations, and solution bill of materials for tenders and RFPs.
- Maintained clear and concise communication with stakeholders, avoiding technical jargon and ensuring understanding of complex concepts.

- Consistently followed industry best practices and maintained up-to-date knowledge of the latest technologies and solutions.
- Diligently proofread all technical proposals and documentation, ensuring accuracy and professionalism in all communications.

Product and Environment:

- Supported multiple products and solutions, including Routing and Switching, IP Telephony, Wireless LAN, Network Security, and Network Management Software, from vendors such as Cisco, Juniper, Palo Alto Networks, HPE Aruba and Solarwinds.

LEAD NETWORK ENGINEER
IBM SINGAPORE
NOV 2017 - NOV 2018

- Led and managed a team of network engineers and security engineers, ensuring the smooth and efficient functionality of the network infrastructure.
- Served as the technical point of contact for capacity planning, security, fault tolerance, and network operations strategies, implementing necessary improvements to enhance network performance.
- Provided guidance and mentorship to network engineers, facilitating network diagnosis, security event management, and the implementation of technical solutions.
- Troubleshot and resolved network-related faults, minimizing downtime and ensuring uninterrupted network connectivity.
- Generated configurations for change requests and supported their implementation for network devices, ensuring seamless integration and minimal disruption to operations.
- Planned and proposed future improvements to reduce network faults and enhance overall network performance.
- Successfully implemented projects based on design requirements, ensuring adherence to project timelines and successful execution.
- Maintained accurate records of network inventory, configurations, and documentation, facilitating efficient network management and troubleshooting.
- Demonstrated expertise in network engineering and operations, staying updated with the latest industry trends and technologies.

Product and Environment:

- Environment: Cisco Nexus, Catalyst, ISR Series, ASR Series, Cisco ASA, Firepower, Juniper SRX, Fortigate Firewall, Cisco WLC, Aruba WLC, Cisco ISE, Cisco Prime, Aruba Clearpass, Solarwinds, HP Server Blade, Dell Server Blade, IBM Server Blade, F5 BIG-IP LTM & GTM.

NETWORK OPERATIONS MANAGER
INDOSAT OOREDOO HUTCHISON SINGAPORE
APR 2016 - NOV 2017

- Led and managed a high-performing Network Operations team, ensuring the successful fulfillment of roles and responsibilities.
- Ensured timely completion of daily provisioning jobs, including cabling and ISP services, resulting in efficient operations and customer satisfaction.
- Responded to and resolved daily trouble tickets within Service Level Objectives (SLO), minimizing downtime and maintaining network reliability.
- Maintained and managed necessary maintenance contracts for all existing services, ensuring uninterrupted operations and compliance with service agreements.
- Acted as a bridge of cooperation between the team and Helpdesk managers, facilitating effective communication and collaboration.
- Provided 24/7 support and escalation for engineers, ensuring prompt resolution of network issues and minimizing service disruptions.
- Collaborated closely with the sales team, attending meetings and acting as a technical expert in proposals and pitches for business.
- Worked closely with customers to understand and capture requirements, ensuring the company's product could meet their needs.
- Ensured the integrity and uptime of operational tools and infrastructure, including ISP, CDN, Backbone, and Data Centers.
- Provided network support to the System Operation team as needed, contributing to the overall efficiency and reliability of network operations..

Product and Environment:

- Supported various international submarine telecommunication cable projects, including JB3JS, INDIGO, JAKABARE, and SMW3, ensuring

successful integration and seamless connectivity.
- Managed the integration of terrestrial backhaul builds and CLS/PoP integration with Sub-sea systems in Singapore, Indonesia, and APAC.
- Worked with Indosat CDN Solutions & Services, Indosat submarine cable systems, and Indosat Data Centers in Indonesia, Singapore, and Hong Kong

LEAD NETWORK ENGINEER
TECH MAHINDRA INDONESIA
JAN 2014 - APR 2016

- Managed service operations at Data Center Hutchison 3 Indonesia (H3I), ensuring smooth functioning of network infrastructure and minimizing downtime.
- Conducted regular monitoring of network devices to proactively identify and resolve issues, maintaining optimal network performance.
- Implemented robust security measures to protect network assets and data, ensuring compliance with industry standards and regulations.
- Managed IP address allocation and maintained accurate documentation of network configurations, facilitating efficient network management.
- Supported servers commissioning and decommissioning activities, ensuring seamless integration of new servers and retirement of outdated ones.
- Oversaw remote access management and VPN account administration, ensuring secure and reliable remote connectivity for employees and clients.
- Coordinated with third-party vendors and internal offshore teams for ongoing projects, ensuring effective collaboration and timely completion.
- Provided technical support and guidance to project managers, facilitating the successful implementation of new servers and applications.

Product and Environment:

- Demonstrated expertise in F5 ASM, LTM, and GTM, deploying and managing hundreds of virtual servers and pool members for Hutchison VAS applications.
- Utilized Cisco Nexus switches, Arista DCS, EMC storage, HP server blades, and SAN switches to build and maintain a robust network infrastructure.

PROJECT MANAGER & PRESALES ENGINEER
NTT COMMUNICATIONS INDONESIA
JAN 2014 - JAN 2015

- Designed, led, and supported the integration of network infrastructure, ensuring seamless connectivity and optimal performance for clients.
- Provided technical presentations and design solutions to support the sales team, contributing to customer satisfaction and successful sales conversions.
- Negotiated pricing of access lines with network carriers, optimizing costs and ensuring competitive pricing for clients.
- Assisted team members in establishing ISP services, NI services, and IP transit services for enterprise and ISP customers.
- Collaborated with other teams to troubleshoot and resolve network problems, ensuring minimal downtime and uninterrupted service for clients.
- Maintained clear and concise documentation of network integration projects, facilitating knowledge transfer and ensuring smooth handover to support teams.
- Diligently proofread all documentation and communications, ensuring accuracy and professionalism in all interactions.

Product and Environment:

- Utilized a range of technologies and equipment, including Dell servers, Cisco Catalyst switches, Fortigate and Check Point firewalls, F5 Networks, VMware, Fujitsu ROR, and Symantec Backup Exec.

NETWORK SECURITY ENGINEER
PACKET SYSTEMS INDONESIA,
JAN 2013 - JAN 2014

- Played a pivotal role in ensuring the highest levels of security and privacy for hundreds of customers as a Network Security Engineer at Packet Systems Indonesia.
- Built, deployed, and monitored firewalls, DDOS shields, and intrusion detection systems, effectively safeguarding network infrastructure against potential threats.
- Configured and deployed network security devices to support business needs, ensuring seamless and secure network operations.
- Deployed access-list control based on business requirements, effectively managing network access and minimizing potential vulnerabilities.

- Mitigated network security incidents by deploying controls and countermeasures, swiftly responding to and resolving security breaches.
- Developed tools to aggregate and monitor network security events, enhancing the efficiency and effectiveness of security monitoring processes.
- Maintained clear and concise documentation of network security procedures and configurations, facilitating knowledge transfer and ensuring consistency in network security practices.

Product and Environment:

- Provided device installation and troubleshooting for CheckPoint, Juniper, Cisco Bluecoat Proxy SG, HP TippingPoint, F5, and other network security devices.

EDUCATION

BACHELOR OF COMPUTER SCIENCE DEGREE
BINUS UNIVERSITY
AUG 2009 - FEB 2013

A world class study program by providing excellent educational experiences in Computer Science, which focuses on developing creative technology solutions, fostering and empowering the society in building and serving the nation.

CS50X COMPUTER SCIENCE
HARVARDX
JAN 2018 - DEC 2023

This is CS50x , Harvard University's introduction to the intellectual enterprises of computer science and the art of programming for majors and non-majors alike, with or without prior programming experience. An entry-level course taught by David J. Malan, CS50x teaches students how to think algorithmically and solve problems efficiently. Topics include abstraction, algorithms, data structures, encapsulation, resource management, security, software engineering, and web development. Languages include C, Python, SQL, and JavaScript plus CSS and HTML. Problem sets inspired by real-world domains of biology, cryptography, finance, forensics, and gaming. The on-campus version of CS50x , CS50, is Harvard's largest course.

COMPUTER SCIENCE FOR ARTIFICIAL INTELLIGENCE
HARDVARDX
2025 - 2025

This professional certificate introduces computer science and artificial intelligence, combining CS50's Introduction to Computer Science with CS50's AI with Python. You'll learn core programming skills and the foundations of modern AI—such as search algorithms, machine learning, optimization, and reinforcement learning—through hands-on projects. By the end, you'll be able to design intelligent systems and build future-ready skills in one of the fastest-growing fields in tech.

SKILLS

TECHNICAL EXPERTISE:

- Strong understanding of MPLS (Multiprotocol Label Switching), IPLC (International Private Leased Circuit), and SD-WAN (Software-Defined Wide Area Network).
- Proficient in networking concepts including TCP/IP, routing protocols, VLANs, and VPNs.
- Knowledgeable in network security principles and technologies.

CONTINUOUS LEARNING:

- Stay updated with industry trends and advancements.
- Participate in certifications and events.

SOLUTION DESIGN:

- Design and architect MPLS, IPLC, and SD-WAN solutions tailored to customer requirements.
- Develop detailed proposals, network diagrams, and technical documentation for these technologies.

TEAM COLLABORATION:

- Work closely with sales teams and engineers.
- Provide guidance and mentorship.

CUSTOMER ENGAGEMENT:

- Excellent presentation and communication skills to explain the benefits and implementation of MPLS, IPLC,

PROBLEM SOLVING:

- Analytical and troubleshooting skills.
- Resolve technical challenges efficiently.

and SD-WAN to customers.
- Ability to understand customer needs and align solutions accordingly.

VENDOR MANAGEMENT:

- Collaborate with vendors to develop comprehensive solutions.
- Negotiate contracts, pricing, and terms with vendors.

PROJECT MANAGEMENT:

- Basic project management skills.
- Coordinate with internal teams and customers.

REGULATORY COMPLIANCE:

- Ensure solutions comply with industry standards and regulations.

BUSINESS ACUMEN:

- Understand business objectives and drivers.
- Align technical solutions with business outcomes.

CERTIFICATIONS

HarvardX - Professional Certificate

- CS50 Computer Science
- Computer Science for Artificial Intelligence

Silver Peak

- EdgeConnect Sales Professional, Accredited (ECSPA)
- EdgeConnect Solution Sales Professional, Accredited (ECSSPA)

Zscaler

- Zscaler Certified Sales Professional

Palo Alto Networks

- Accredited Configuration Engineer (ACE) Exam - PAN-OS 6.0 Version

Cisco

- Cisco Enterprise Networking Black belt (Black Belt Cisco DNA Deployment)
- Cisco Enterprise Networking Black belt (Black Belt Cisco DNA Presales)
- Cisco Certified Network Associate Security (CCNA Security)
- Cisco Certified Network Associate (CCNA)
- Cisco Express Networking (CEN)
- Certified Meraki Networking Associate (CMNA)

SolarWinds

- SolarWinds Certified Professional - Network Performance Monitor

Check Point Software

- Check Point Certified Security Administrator (CCSA)
- Check Point Certified Security Expert (CCSE)

HP

- HP Accredited Integration Specialist (AIS)

PORTFOLIO

Professional Portfolio
Role: Presales Solutions Architect

Industries Managed:

- **Financial Services Industry (FSI):** Designed and supported WAN/LAN network solutions for major banks in Singapore, including DBS, UOB, OCBC, NETS, and BCS.
- **Trading & Exchange Companies:** Managed WAN/LAN network requests for global trading platforms and exchanges such as Refinitiv (London Stock Exchange Group) and Singapore Exchange (SGX).
- **Top Hedge Funds:** Provided secure, low-latency network designs tailored for high-frequency trading and critical financial operations.

- **Enterprise Customers:** Oversaw WAN/LAN network projects for 1,000+ enterprise customers across diverse industries, ensuring scalability, reliability, and compliance.
- **Carrier / Wholesale Customers:** Delivered complex WAN connectivity for hyperscalers and global carriers, including Microsoft, Meta, AWS, and other major telco providers.
- **Designed and architected carrier-grade backhaul**, IEPL/IPLC, and DWDM networks (20–80 Tbps) for ADC, SJC, and SJC2 cable systems in Singapore, delivering multi-path and geo-redundant diversity using Nokia, Infinera, Ciena, and Ribbon platforms.

  Delivered end-to-end backhaul, IEPL/IPLC, and DCI solutions for hyperscaler cloud customers (Microsoft Azure, AWS, TikTok), spanning subsea landing stations, metro, and long-haul transport with high availability and low latency.

  Served as lead technical presales architect for Singtel Wholesale, **stabilizing and driving USD 150M+ in annual revenue** through robust solution design, customer engagement, and capacity planning.

Key Responsibilities:

Solutions Architect:

- Design and implement comprehensive network solutions.
- Specialize in WAN connectivity, MPLS, SD-WAN, dark fiber, DWDM, submarine cables, and data centers.

Service Manager:

- Ensure continuous and reliable service delivery.
- Maintain high customer satisfaction through proactive management.

Project Manager:

- Oversee projects from initiation (D0) to delivery (D2).
- Coordinate cross-functional teams to achieve project milestones.

Technical Expertise:

- WAN Connectivity: Design and manage wide area networks to optimize performance and reliability.
- MPLS (Multiprotocol Label Switching): Implement and manage MPLS networks for efficient data routing.
- SD-WAN (Software-Defined Wide Area Network): Deploy SD-WAN solutions for enhanced network agility and reduced costs.
- Dark Fiber: Manage dark fiber installations for high-speed, high-capacity connections.
- DWDM (Dense Wavelength Division Multiplexing): Implement DWDM technology for increased bandwidth over fiber optic cables.
- Submarine Cables: Oversee the deployment and maintenance of undersea cables for international connectivity.
- Data Centers: Design and manage data center solutions to ensure optimal performance and scalability.
